PROFESSIONAL SUMMARY

A seasoned professional with extensive experience in ICT support, network management, and SAP system optimization. Proven ability to troubleshoot technical issues, implement robust IT policies, and enhance system security with measures such as advanced password requirements and access controls. Well-versed in various IT technologies, including robotics, SQL, and machine learning, with solid system administration, data management, and project implementation skills. Demonstrated success in providing technical support, managing IT projects, and maintaining system performance. Passionate about transitioning into cybersecurity roles to apply my expertise in securing IT environments and developing innovative solutions with a global impact.

TECHNICAL SKILLS

- Network Infrastructure
- SAP Functional Support
- ERP Systems
- Microsoft Office
- Database Management
- Robotic Process Automation (RPA)
- System Configuration and Maintenance
- Reporting and Documentation
- Customer Support
- **Tools:** Machine Learning, SQL

WORK EXPERIENCE

Information Technology Officer

— Hunters Paradise Cottages

March 2021 - Present

Key Responsibilities/Achievements:

- Provided daily ICT support by promptly managing and troubleshooting technical issues, minimizing downtime, and maintaining operational efficiency; successfully created an Active Directory for computer users within a month, significantly enhancing user data management efficiency.
- Conducted user training and provided comprehensive support for property management systems and network enhancements, significantly improving user competency and system utilization; achieved this by recommending a new ERP system that streamlined data flow and eliminated manual accounting entries, greatly enhancing operational efficiency.
- Managed all aspects of network infrastructure, including cabling, wireless networks, switches, and security applications, ensuring robust performance and security, and achieved this by initiating IT policies that strengthened system security with enhanced password requirements and stricter user access controls.
- Maintained hotel servers, workstations, networking equipment, phones, and user accounts by performing regular maintenance tasks to ensure optimal performance, reliability, and efficiency of the IT infrastructure.

- Responded professionally and efficiently to all IT-related queries from staff and guests, promptly resolving issues and enhancing overall satisfaction with IT services.
- Developed and implemented a preventive maintenance schedule for all IT infrastructure, proactively conducting regular checks and updates, minimizing unexpected system failures, and ensuring consistent operations.
- Oversaw the configuration and management of network systems, servers, workstations, and telephony systems, ensuring seamless performance and contributing to stable and efficient IT operations across all platforms.
- Maintained an up-to-date inventory of all ICT assets, including hardware and software, to enhance asset management, track usage, and optimize resource allocation for more efficient operations.
- Prepared and submitted detailed monthly ICT reports to Directors, providing insights into department performance and operations, guiding strategic decisions, and improving overall ICT effectiveness.
- Maintained detailed ICT logs of user-reported issues, tracking and updating each problem's status to ensure timely resolution and enhance the effectiveness of technical support.
- Implemented comprehensive data security measures, including regular backups, cybersecurity risk assessments, and access controls, achieving a 90% reduction in data loss through a custom weekly backup script.
- Spearheaded the technology setup for a new hotel branch by designing the network infrastructure, procuring hardware and software, and leading the installation of critical systems, ensuring seamless operational readiness from launch.

SAP Functional and Technical Support

— Bidco Africa Limited

July 2019 - Feb 2021

Key Responsibilities/Achievements:

- Responsible for maintaining SAP Master Data by regularly updating and verifying material records. My efforts led to a 97% reduction in material redundancy within 5 months, significantly increasing report accuracy and streamlined data management.
- Implemented a scheduled backup process for SAP data, ensuring regular and secure backups. This proactive approach resulted in a 90% reduction in potential data loss, greatly enhancing data security and reliability.
- Successfully identified and highlighted critical raw and packaging materials in SAP to improve inventory management. This initiative prevented production delays and ensured that essential materials were always in stock.
- Maintained databases required for training, testing, and production by regularly updating and ensuring their integrity. This supported seamless training and reliable production operations, improving overall business processes.
- Managed the installation and configuration of SAP software for users, ensuring a smooth deployment. My work facilitated efficient software usage and improved user satisfaction and system performance.
- Conducted training sessions to support deploying SAP logistic solutions using SAP S/4 HANA. These sessions ensured successful deployment and improved user adoption, enhancing logistics and operational efficiency.
- Resolved user issues across SAP modules and tested new improvements to ensure their effectiveness, enhancing system functionality and user satisfaction while optimizing performance before full implementation.
- Installed, diagnosed, maintained, and upgraded computer equipment, software, and peripherals. This included ensuring that all software and antivirus applications were up to date, which kept systems secure and functioning optimally.
- Operated the Fresh service help desk, providing prompt, professional, and friendly assistance. By introducing a service bot, I made the help-desk interface more user-friendly, increasing user interaction with the system by 82% and improving overall service delivery.

- Played a crucial role in spearheading Robotic Process Automation using Automation Anywhere software. This initiative reduced operational costs by 35% within one month and significantly improved task efficiency and execution.
- Updated inventory records in SharePoint to ensure accurate and current information. This facilitated easy collaboration and improved data accessibility for team members.

OTHER EXPERIENCES

- **ICT Intern**, Public Service Commission, 2019
- **Accountant Controller**, Koral Paints, 2017

EDUCATION

Bachelor of Science in Mathematics and Computer Science

— Jomo Kenyatta University of Agriculture and Technology, **2016**

First Class Honors

CERTIFICATIONS

Certificate of Computer Package

— Elgon College, **2012**
